# Overview

**Understanding GitHub organizations**

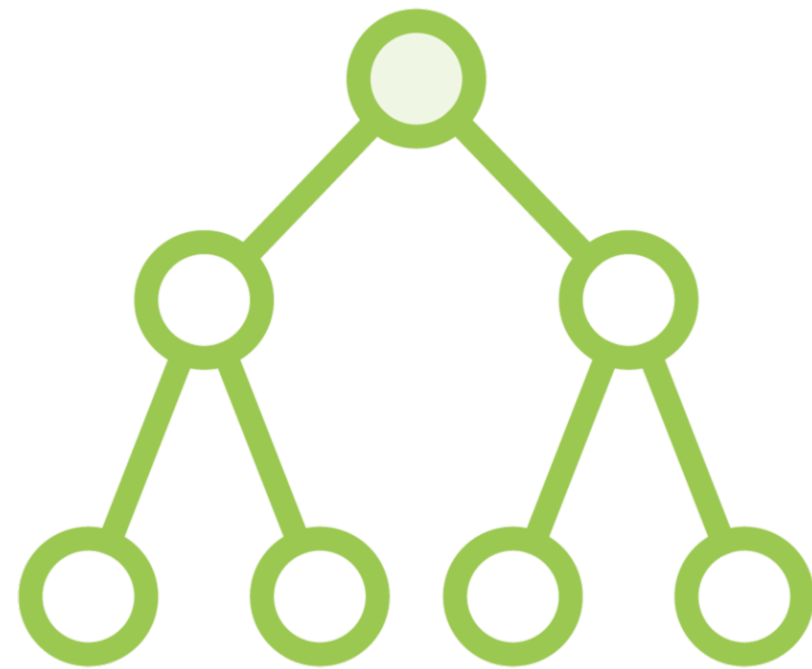

**Working with teams**

# Understanding GitHub Organizations

---

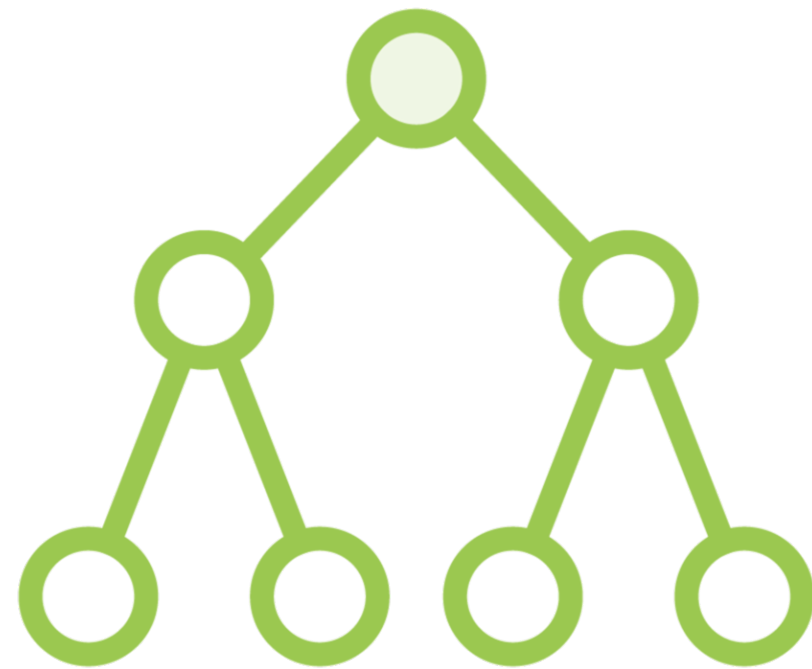

## Organization on GitHub

- Shared account for collaboration
- Owns repositories
- Fine-grained access control
- Available for free or paid accounts

## Can be created

- from scratch
- by changing an existing account

## Members can be invited

# Important Roles within an Organization

**Owner**

**Member**

**Outside collaborator**

**Other**

# Demo

**Creating an organization**

**Adding users to the organization**

**Working with permissions**

# Working with Teams

---

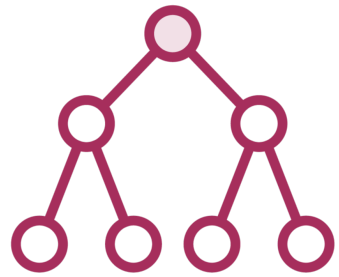

# Working with Teams

**Structure of group**

**Possible to nest**

**Access to repositories**

**Notifications**

# Demo

**Creating a team**

**Settings for the team**

**Managing the access**

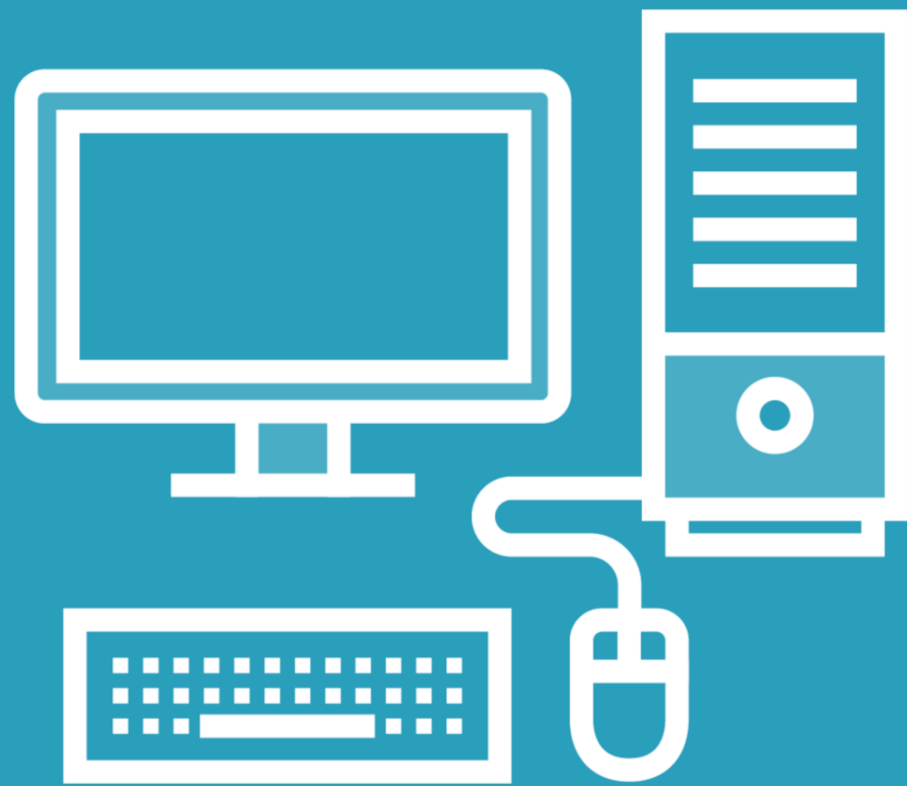

# Summary

**Organization brings people together**

**Teams offer a fine-grained ability to manage members and permissions within your organization**

**Up next:**  
Using the GitHub desktop  
application
