Overview

Creating a Gist

Working with GitHub Projects

Publishing information using GitHub Pages

Creating a Gist

Gist is a simple way to share snippets and notes
with others

Using Gists

Sharing

Based on repository

Public or secret

Can be downloaded

Creating a project board

Adding and managing issues

Publishing Information Using GitHub Pages

GitHub Pages

**Static hosting
No server-side code**

Repo

Online or offline

Demo

Creating a simple GitHub Pages site

Summary

Gists allow for easy sharing "small" amounts of code

Projects extend issues to make GitHub into a project management system

Pages allow repos to be used to host a static site
